

Blockchain Diversified Fund of Funds

FDC Advisory

*“Consistent capital growth
with strong capital preservation.”*

Objectives

To provide investors with a risk-managed exposure to the emerging blockchain economy via a 'fund of funds' structure. The Fund is targeting a return of at least 25% per annum over the medium term, while managing risk through diversification and active asset allocation. Volatility is expected to be significantly lower than that of the CCI30 Index and the major digital-assets.

Our Beliefs

- ▶ Consistent capital growth is a key objective for investors;
- ▶ Capital preservation is as important as capital gain;
- ▶ Diversification and active management can substantially mitigate the risk of capital loss in a volatile market; and
- ▶ Superior research, supported by deep technical expertise and disciplined portfolio management, can deliver strong risk-adjusted returns.

Our Investment Approach

A well-diversified fund of funds approach is the most robust basis for generating and preserving wealth in the emerging blockchain economy. We seek active managers that specialise in investment in digital assets and blockchain infrastructure technologies. A portfolio of outstanding managers and a focus on absolute returns can lower investment risk and enhance returns.

The FDC Portal Fund portfolio has two distinct investment streams with the following objectives:

- ▶ To achieve consistent returns throughout the market cycle through an allocation to systematic momentum and arbitrage trading strategies; and
- ▶ To gain exposure to potential high return opportunities over the longer term through an allocation to managers investing in blockchain infrastructure development.

Investment Process

Our investment team works very closely with blockchain industry experts in identifying investment opportunities, as well as developing new investment insights and ideas.

We conduct research into the capabilities of the underlying fund managers through both qualitative and quantitative analysis. Our focus is on:

- ▶ People: Technical and investment expertise;
- ▶ Process: Discipline, durability and risk management;
- ▶ Governance: Regulatory, systems, asset security; and
- ▶ Performance: Real return, consistency.

Quick Facts
